ODP #81-909

ORD 855-81

13 July 1981

MEMORANDUM FOR: D/ODP
                AD/NDP/NPIC
                C/SP/ODP
                C/IHSA/DDA

STAT   FROM:

Chief, Processing and Analysis Technology Group

SUBJECT: PATG FY-82 Program Review

    1. The Processing and Analysis Technology Group of ORD will
STAT be meeting [   ] from 3 to 5 August to review our program
plans for FY-82. We hope that some of your staff members can
attend. If so, we would like to have one of them participate on
the morning of 3 August in a discussion of support environments
and give us an overview of present and near-term computing
environments as you see them.

    2. One purpose of the conference is to understand how the
modeling software, which is one of our major research products,
can best adapt to fit the changing computer environment in the
coming years. Also we hope that a review of our research plans
will give you an indication of the kind of computer support
analysts will be requesting when new computer-based models and
analytical tools become operational.

    3. If someone from your organization will be attending,
STAT please contact [   ]s soon as
possible so we can arrange for your transportation.

                                                          STAT
